As a big fan of the original Arvale series (playing on my pocket pc long long time ago:)) I have to admit it is a great sequel of them with unique humour and awesome 16bit jrpg retro style!. Duuuude.....sweet.. A great way to support the devs, plus the music is absolutely amazing! Thank you so much Team Nekojishi, as cliché as it sounds, this game has done a lot for me. I doubt my story is interesting to anyone, but Nekojishi has actually helped me a lot with coming to terms with being gay. Personally, I live in an accepting environment, but my family is the one thing that kinda kept a constant fear on me, plus stereotypes. It may be stupid, but Laio felt sincere and very relatable, and this simple story kinda helped me come to terms with that I'm not a disappointment (entirely), or a bad person. It, really did help me a lot. I wish I could do a lot more to help, just thinking about this game has me in tears. I really mean it from the bottom of my heart when I say thank you. Now I'm extremely happy with my boyfriend of 7 or 8 months :)

PS: Shu-Chi will always be best boy <3. MEH, MEEEEHHHHH... I don't have much to say on this game. Mainly since there are many different sections of the RPGmaker engine, this one happens to be based off of the least balanced one.

You have 4 characters two of which are 'mages' but they consistently do more dmg with physical attacks than with their skills. And one of the characters sucks for the entire game doing jack squat both for damage and healing, because the calculations for those in this particular engine are royally screwed up.

And the main character is going to deal 80% of your damage because the weapons he gets has such high attack stats.

Plus the game sort of feels like one big boss rush, which i like, except the standard enemies are either way too frequent, or are way too difficult for when you first fight them.

On a positive note the end credits music is really enjoyable.. I have seen Sodapoppin played it on stream and it looked very nice. I went on the steam page and saw the price. That's the first time I see a simple game and most importantly a GOOD game so cheap ! This game is worth 10 euros / 10\$ at least.

Very nice soundtrack, i recommend to buy the pack game+soundtrack (It also support the game for being cheap i guess)

About the game, the musics are beautiful, you will finish this game in 1h if you're god and 3-8h if you're a normal person. Or you will give up. Yeah this game kinda hard but really good at it. Also the game is gentle and doesn't kill you everytime you miss the perfect spot.

Great game, great soundtrack, low price. What are you waiting for ?

I can see how people like this game. It is fast and challenging. It did not give me much motion sickness, but perhaps I am not very sensitive to VR sickness. This game is good but it definitely won't satisfy real skiers (I am one).. The music is catchy, and the sound effects are hilarious. I love the turkey gobble. And the wit, aimed at both sides of the aisle without mercy. Thumbs up.. In it's current state, I cannot recommend this game.

It has some great concepts, beautiful graphics, relatively easy to use UI and I'm sure it is going to be a great game when the bugs are ironed out.

I will revisit this game in a few months and hopefully change my review to positive.

. Not nearly as bad as it could be.

Has some pretty funny 2018 references.

It's probably "Big Enough" for the price tag.

Definitely OK.

<https://youtu.be/VHxtmYiRY9ic>. Great support to those players who need it. And it teaches us how to become the best player possible. Thanks everyone. Awesome game to play with friends just not recommended for anyone playing on a laptop get a desktop to play your game will play much smoother.. From enemies constantly getting stuck in walls causing you to reset from the start to failing challenges the moment you start the wave.
