### About This Content

Here lies the original soundtrack recording for The Binding Of Isaac - Rebirth.

Matthias Bossi and Jon Evans play everything, and when they can't, they do it anyway. Many guitars were maimed in the making of this. Drums were punished and voices scraped to the utmost. An analogue bull in the chip-tune china shop.

This is a tower defense game with a different twist, the enemy is just a (generally) physics-correct liquid.

Now, to be fair, I played Creeper World 3 first so there were some things that I was expecting that weren't in this game. That said, this game was quite good. I played through the campaign and it frustrated me that I didn't have access to reactors until so late in the campaign, though it does tend to make the game a bit more trivial once you get them.

I think it's definitely worth a play, especially if you haven't played later iterations of the series yet. It's a great series, the campaign is fun, and I definitely recommend for people who are either fans of TD and looking for something a bit new or people who are interested in trying their first TD game.. Not a bad game but playing it even on expert made me sleepy. 2casual4me. Cute Achievements though.. Overpriced even on half price. Don't waste money on this game. The reaper after the last patch is more like a T2 ship anyway.. Cool Game But the only thing that annoy me is how many ♥♥♥♥ing levels are there im at stage 30 and when is it gonna end XD but overall i love the game so imma keep playing 6/10 would recommended.. A new take on a "party game".

You The VR Guy are the Overlord and your friend is the android and the android has to escape.

Two (or more!) players in a single VR game is a great idea and seriously makes quite a good "party game".

I'm saying "party game" cause the game can also be quite a party pooper since someone always has to lose.

I recommend this came 100% for VR players. Seriously good fun.

UPDATE\* After two years the developer did update the worst level for racism by toning down the Asian guy (not stoked they left the hat on him) and the blackface guys are completely gone.

The "Vatos" gamng member enemies in the Borderlands level are unchanged, which was very disappointing. They have them roll up in a car like a drive-by shooting at one point, too. ffs

Still, progress is progress. If they had a between thumbs up/down option on Steam it'd be easier but for now I may as well recommend it with a strong warning about some of the offensive content.

A great take on the clicker genre that is ultimately ruined by pointless racism. It's a shame that such artistic talent had to go that direction; it did a disservice to the game as a whole. The gameplay, music and detail are all fantastic but... why? --

If that kind of thing doesn't bother you, well, go for it... I didn't see any real humor in it.

In before "too sensitive SJW lolz" you have your opinion I have mine.. Cannon Fodder V2.

Awesome game!. It's a good game but it's very short. Easy achievements and it's free2play so why not give it a shot? :). Played hundreds of hours on the original as a kid, loved the hell out of it.

This is very much the same mindless fun destructive racing game, still love it and im glad the devs didnt make the mistake of overcharging for it.

Would recommend to anyone who wants a fun arcade driving game. Fun, relaxing game with interesting graphics and good music. Definitely screws with your head while trying to get the hang of the movement but instincts take over fairly quick. The difficulty increases as you progress but never feels unfair. I enjoyed the simplicity of the whole experience while still being challenging.. Not a single\u2665\u2665\u2665\u2665\u2665\u2665 I'm severely disappointed. The premise of the story is that a friend of yours has come across an old VHS tape of a person who is exploring a town known as 'Blue Valley' whose town people have mysteriously disappeared. Your friend comments on this tape as you watch it together, a tape which for some reason you can control what it sees? The big mystery of why everyone is dead? Why there is a massive temple hiding an extra-terrestrial tree? Why do vanishing people want the camera man dead? And why a camcorder seems to have infinite power on zero battery life is never really explained? Hence the whole walking around adventure seems rather pointless at the end. NOTHING is answered.

The even bigger mystery which this game offers which I would really like solved is this ... Why is there even ONE positive review to this game when there clearly should be NONE whatsoever. Why do you ask? Well let\u2019s start with the fact that the programming is so bad you can walk off cliffs, get stuck in stair wells, see through boulders, become one with a picket fence and have the game have a psychotic crash causing reboot for absolutely no reason. Should I continue???

The whole cheap gimmick of 'found footage' does not work. You NEVER really feel that you\u2019re a part of anything. Why? Because your brain should have enough common sense to tell you that you should not be able to control VHS footage found. On top of this, the developer has sacrificed voice acting for flashing written messages on screen like cheaply done subtitles which just ruins any moment of realism.

The objective of just walking around a town to discover how many bugs you can find does not make good entertainment. The only puzzle in the game is to find eight objects with the word 'obtain' visually placed over the top of them. This again ruins any feeling of realism you may get. You need to place the aforementioned items on the eight podiums in the temple. A secret stairwell will then appear which sends you to an ice dungeon that houses a gigantic tree. This tree has a stairwell/ portal which apparently leads to a beyond. It's really not hard to find 8 objects which have big words 'obtain' over them, but still you will somehow probably more likely find bugs before you find the objects in question.

The game was made, rushed, botched and forsaken by these people <http://www.kuchalu.co.uk/> . [I really don't get it? Are we that starved for good games that we will now give a thumbs up if a developer at least gets one thing right? While the musical](#)

score is good, it sadly gets drummed out by the snow storm? Likewise, while the graphics are top-notch, they're effect has little positive impact since your experience will be constantly jarred by bugs and badly developed game play.

How can one admire a flower in a paddock of muck and mire???

Seriously the game is so pointless since it doesn't answer a damn thing and is so badly orchestrated in coding that the game sent me into a blue depression. With half-hearted presentation and sparse narrative, and a cold meaningless setting with nothing really important to say left me deeply saddened and plagued with only one question \u2018how do I get out of this Blue Valley they have put me in?\u2019
